

Disaster Recovery-as-a-Service (DRaaS)

Recovery: the unsung hero of disaster

Is your business more focused on protecting data than protecting applications?

Applications typically span multiple Virtual Machines (VMs) and are more complex in terms of dependencies and infrastructure. They can require recovery with write-order fidelity, database consistency, and more—something most replication solutions do not supply. We can help protect, recover and set protection policies for your applications that meet your business objectives, so in your time of need you have peace of mind.

Quest's DRaaS

Combining protection, orchestration and automation all in one. There are no hidden costs, later discovered dependencies or lengthy custom scripts needed for recovery.

As a software only solution, Quest's DRaaS does not require any changes to current environments or downtime to implement. Your business has everything to protect and nothing to lose.

Quest's DRaaS Service Level Agreements

Service Level Agreements with Quest are as easy as 1-2-3. Quest services work with your business to discover the criticality of your businesses' applications and recovery requirements.

Quest's DRaaS with Managed Services

With Quest Managed Services your business platforms, applications and functions are monitored and managed. In the event of a declared disaster, Quest services are available around the clock—and around the world.

Quest's Professional Services

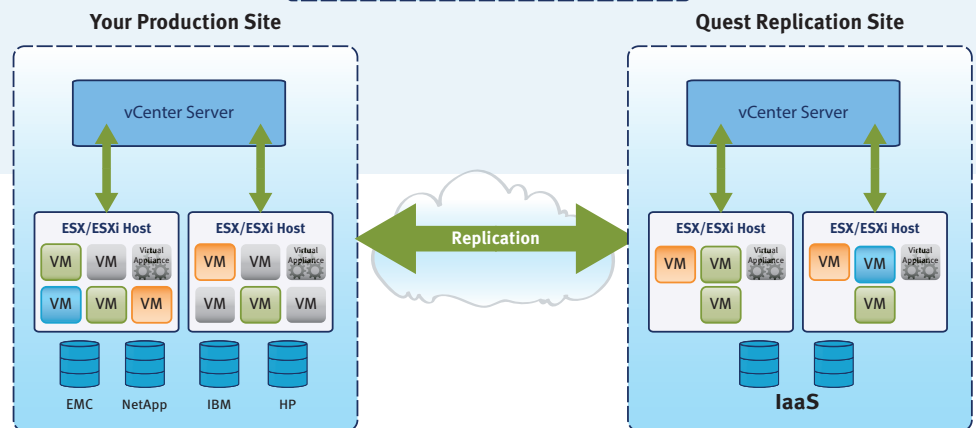

With Quest Professional Services, your business can do what it does best while we do the work for you. Quest can implement and manage your Disaster Recovery solutions as well as your Backup solutions, just ask!

1 You Choose What to Protect

- Critical Applications
- Business Data

2 You Engage Quest Services

- Critical Applications: ✓ Protected
- Business Data: ✓ Protected

Quest's DRaaS is built on Quest's IaaS

Quest's DRaaS is built on top of our multiple award-winning Infrastructure-as-a-Service (IaaS). We provide the needed infrastructure for DRaaS for a low monthly fee, charging your business for capacity, utilization and over-subscription only as needed. Flexible and dynamic—that's the Quest cloud.

Quest's DRaaS:

- simplifies recovery & reduces costs with no additional IT overhead
- flexible and cost-effective
- recovery objectives can be set and met per application group or site
- default RPOs and RTOs are four hours and can be defined in seconds or minutes

Quest offers an impressive range of flexible, scalable capabilities and services, all of which can be customized so you get exactly what you need when you need it.

Quest's DRaaS Solution - Flexible & Reliable

Invest in the Capability, not the Product®
