

Customer-driven Technology Management Solutions

To help your organization grow & thrive

When you decide to entrust someone

with your core technology objectives, you count on reliable, unbiased advice. In fact, you expect it. Discover for yourself why Quest is one of the nation's leading technology consulting and management firms.

With Quest, your needs always come first, and your ongoing success is our top priority. Benefit from our experience with all types of Fortune 50-5000 corporations, as well as our IT expertise built over 30 years' experience with industry trends and requirements. You'll find a partner that values trust—trust that builds a mutually confident relationship which will be sustained by exceeding your expectations.

Engage Quest. We offer one-source confidence for all your technology needs.

Need customizable Cloud Services? Managed Services? Help upgrading your IT infrastructure or network? Technology Consulting, Project Management or Staff Augmentation? Quest brings over 30 years of experience so that you can be confident you'll attain your business technology goals.

How can we help?®

Invest in the Capability, not the Product®

Risk Management

Technology risk has implications beyond the IT department, so we take a strategic, integrated look at IT risk. We will help uncover and mitigate threats that may be present throughout your organization.

Managed Services

Reduce CapEx and get the capability you need. With Quest Managed Services, you choose the degree of control over your IT services.

Professional Services

Quest combines people, processes, and technologies to achieve your goals, including systems engineering, application development, and infrastructure services.

Cloud Computing Solutions

Powered by our global network of 24x7 Service Delivery Centers and our customizable Shape Your Own Cloud® options, Quest's Cloud supports shared as well as dedicated hosting in private, public, and hybrid cloud environments.

Virtualization & End-User Computing

A Quest virtual desktop solution — either Desktops as a Service (DaaS) or Virtualized Desktop Infrastructure (VDI) — reduces desktop costs while improving security.

Mobility

Manage it all with “bring your own device” (BYOD) management services. Our data loss prevention solutions can help you protect mobile data from theft or compromise.

[continued >](#)

Helping clients manage their technology for over 30 years.

Network Health & Management

Quest's Network and Application Monitoring and Management Services provide proactive alerts that identify problems before they interrupt operations.

Managed Security & Data Protection

Protect confidential data both in transit and in storage with Quest's Managed Security services. Don't know where to start? Let us conduct a Risk Management Workshop for you and find out.

Physical Security & Infrastructure

Get everything you need for physical security with Quest capabilities such as Video Surveillance-as-a-Service, Access Control, and Panic Button/Incident Response. Engage us for a complete physical infrastructure consultation, design, installation, and deployment to ensure your wires, cables, and wireless signals are up to snuff.

Application Development

Utilize Quest's Application Development services to create and/or adapt software applications, including customer and social media apps, without investing in a dedicated appdev environment.

Contract Management Solutions

Benefit from the insight Quest can provide into the state of your IT assets. Simplify renewals, get up-to-date views of lifecycle information, and quickly resolve issues. Customize your ownership and management options with QuestFlex, Quest's unique SLA that provides industry leading technology and services capabilities in any configuration you choose.

Collaboration & Hosted HD Videoconferencing

Face-to-face communication and collaboration over long distances has never been easier or more affordable – Quest's collaboration capabilities include call control, messaging, videoconferencing, and more.

Data Storage, Co-location & Business Continuity/Disaster Recovery

The availability and resilience of your systems, networks, applications, and data has never been more important. Quest's cloud-based backup services can integrate real-time data replication, secure data storage, and quick-restore capabilities, and our experts can help you get it right with Business Continuity/Disaster Recovery solutions customized to match your needs precisely.

IT Staffing Solutions & Services

Save time, money, and hassle by letting Quest find the right people with the right, engineer-screened expertise to meet your staffing requirements.

Technology Products & Quest Partners

Need help determining which tech products are right for you? Our team of product specialists, inside sales reps, and account managers offer expertise and competitive pricing to help you make the right decisions.
