

Don't Buy or Lease Technology Again!

How to get the capability you need — with QuestFlex[®]

Buy or Lease Technology

Consider QuestFlex[®]

What if for one monthly price, you could ensure that your IT services were provided, maintained and supported? A QuestFlex[®]

SLA provides industry leading technology & services capability in any configuration you choose. **Specify**

your own requirements ranging from virtualization, storage, servers, network equipment, VoIP to complex application environments to power your entire enterprise. Faster time to market, ease of scalability, higher performance, reliability and security at your facility or at one of Quest's Global Service Delivery Centers. In addition, **your Service Level Agreement (SLA), qualifies as an operating expenditure, not a capital expenditure.**

QuestFlex[®] is a powerful business tool that provides:

- Decreased costs securing your technology requirements
- Access to technical expertise and competencies your organization may not have available – **Devote your time and effort to operating your core business and driving revenue, not purchasing and supporting technology**
- Improved performance and efficiency
- Enhanced service flexibility and integration of complexity

Manage Your Risk

QuestFlex[®] offers unique protections against many forms of risk, including:

- Reducing the time required to implement new technologies
- Improve your IT security, privacy & the availability of your data and applications
- Scale required technology & resources quickly
- Eliminating the need for CAPEX expenditures for upgrades to software and hardware due to obsolescence or market changes
- Ensure you get the capability you need. Don't get stuck with products sitting on the shelf with no one to support your solution
- Eliminating guesswork. The right equipment and software is provided – tested, installed, configured, tuned and managed.

Invest in the Capability,
not the Product™
