

Threat Level Review Pricing

Quest enables organizations

to assess business risk and improve their security posture through automated lifecycle vulnerability management. Quest provides on demand network discovery and Threat Level assessment reporting, remediation tracking, and enforcement of security policies. There is no infrastructure to deploy or manage. Quest

helps organizations measure and document regulatory and policy compliance systematically and accurately.

Benefits include:

- On demand technology offers significant economic advantages with no capital expenditures, extra human resources or infrastructure to deploy and manage.
- Mitigate risk by automating the proactive identification and prioritized remediation of security vulnerabilities based on risk to business operations.
- Rapidly identify and visualize network assets.
- Ensure regulatory compliance via automated auditing, indelible audit trails, and the validity and assurance that comes with third-party assessment.
- Unprecedented scalability makes it ideal for large, distributed organizations.
- **PCI: Quest is a certified PCI Scanning vendor.**

Pricing

One-time Threat Level Scans: Quest will provide scanning for internal and external IP addresses. This service is based on a one-time scan. The customer will receive a Threat Level Scan report which will indicate the vulnerability by the IP address. For internal IP addresses, Quest will provide an internal scanning device.

- Cost per IP address per scan: \$35*

Scheduled Scanning: Quest will provide scanning and report for inside and outside IP addresses. The report will include a detail summary of the scan results.

- Quarterly Vulnerability Scanning (four scans per year): \$55 per IP per year*
- Monthly Vulnerability Scanning (12 scans per year): \$75 per IP per year*

Unlimited Vulnerability Scanning: Quest will provide unlimited vulnerability scanning for inside and outside IP addresses. The report will include a detailed summary of the scan results.

- Unlimited Vulnerability Scanning: \$125/IP per year*

Annual Vulnerability Scanning and Executive Report: Quest will provide an annual scan and report for inside and outside IP addresses. Quest will deliver an executive summary which includes high level security concerns, recommendations, priorities and budget ranges. The report will also include a detail summary of the scan results.

- Annual Vulnerability Scanning and Executive Report: \$150/IP per year*
- Semi-Annual Vulnerability Scanning and Executive Report: \$225/IP per year*

PCI Scanning: Our service includes a review of your requirements, four PCI scans per year and review for any failed scans.

- Certification package: \$3000/yr (Includes quarterly scans for five external IP addresses and report consultation).
- Additional IP addresses: \$250/IP

Threat Levels Are On The Rise

Trust Quest's Three-point Process to Protect Your Business.

1. Kick-off

2. Scan

3. Report

* Minimum Internal IP Addresses: 25
Minimum External IP Addresses: 10
