5nine and Quest Partner to Offer Security as a Service in their Datacenters

*Quest Delivers Security as a Service to Its Customers with 5nine Cloud Security
and the Free 5nine Extension for Azure Pack*

Click to Tweet: 5nine and Quest Partner to Offer Security as a Service in their Datacenters

CHICAGO, IL (Oct 14, 2015) – 5nine Software, the leading global Hyper-V virtualization security and management provider, announced that it is partnering with Quest®, a Technology Management company, to offer their customers Security as a Service (SECaaS). With 5nine Cloud Security Azure Pack Extension, Quest will now deliver SECaaS to its customers by enabling tenants to protect their Windows Server, Windows, and Linux virtual machines directly through the Azure Pack portal.

"We are happy to boost sales for our partners like Quest by expanding the services that they can offer to their customers with 5nine Cloud Security," said Symon Perriman, VP of Business Development at 5nine Software. "Now not only can Quest provide greater security for their customers, but also generate new revenue by delivering Security as a Service as a value-added offering."

5nine Cloud Security Azure Pack Extension is the only SECaaS solution to protect private, public and hybrid clouds running on the Microsoft Cloud Platform. It allows hosting and service providers to secure multi-tenant environments and virtual machines through Azure Pack. With the 5nine Cloud Security Azure Pack Extension, Quest will now be available to:

- Differentiate themselves and monetize by offering one-click Security as a Service
- Provide automatic and immediate agentless protection for tenants for guaranteed security
- Run more virtual machines on each host due to 5nine having the lowest scanning performance impact in the industry

"As a solution provider with more than 30 years of experience, we are committed to helping our customers achieve the IT capabilities they need and want," said Tim Burke, Quest President and CEO. "To that end Security as a Service is an essential addition to our growing solutions portfolio and we are very pleased to partner with 5nine Software and extend its value to our customers while improving our own security and compliance."

About Quest
With more than 30 years of experience helping businesses adapt and thrive with evolving technology, Quest is one of the most established and versatile managed service providers, and a worldwide leader in technology management offering a portfolio of professional, cloud, and managed services. Either on-site or from one of over two dozen secure global service delivery centers, Quest offers security, disaster recovery, business continuity, data backup and replication, Desktops as a Service, virtualization, system performance, application development, and wireless solutions to power and manage your entire enterprise.

Quest was one of the winners of CRN's Triple Crown Award and was named to their recent Fast Growth 150, Solution Provider 500, Tech Elite 250 and Managed Service Provider Elite 150 lists.
