

# Physical Security Assessment

Examine and fortify your building access control and video surveillance systems

## Quest's Physical Security Assessment will give you:

### Environment Review and Recommendations

Whether you're looking to protect your employees or facilities or both, our Physical Security Assessment will gauge your surveillance and access controls to determine how secure and effective your system really is. Based on the organizational requirements and priorities you identify, your Assessment provides a comprehensive review of your physical security landscape and uncovers any vulnerabilities or gaps:

- Identify exposed areas supporting critical business operations
- Examine existing and potential sources of threat or failure, including physical location and hardware/software controls
- Evaluate coverage goals and equipment/connectivity requirements
- Outline areas in need of technology upgrades or deployment

### Specific Next Steps

With all findings prioritized by level of risk, our experts will create a customized, actionable Executive Summary to directly address your physical security concerns and any vulnerabilities uncovered during the Assessment. Armed with thorough recommendations and practical options, you'll gain insight into your unique security challenges and how to resolve them so that your assets are protected.

### An Expert-Approved Plan

A Physical Security Assessment with Quest enables you to take a proactive stance towards better securing your people, property, and business environment – and comes with over 30 years' experience in the industry. Along with our expertise, we provide rationale for our recommendations, so your company can go about its business with total confidence.

## ASSESSMENT DETAILS

### Date/Time

What works for you and your team? Depending on your availability and requirements, we can meet with you as soon as possible, or in the near future.

### Location

The Physical Security Assessment\* is conducted onsite at the location(s) being assessed.

\*One assessment per location

### Recommended Attendee Titles

If you are not the business owner and/or key decision maker, please ensure they are present; business operations/decisions are directly tied to technology requirements for most organizations. We also recommend having these key team members present:

COO   CRO   CTO   CAO   CCO  
Department Managers   Current CSP Staff  
Building or Facility Manager

### Preferred Documentation to Review

We recommend, if available, having the following items ready to review for this Assessment:

Building Blueprints   Network Drawings

### Timeline at a Glance

**Pre-Workshop:** Schedule kickoff call, establish priorities

**Kick-Off Call:** Introductions, agenda, expectations

**Assessment:** Conduct an onsite Assessment

**Final Review:** Quest provides Executive Summary including recommendations and action items
