

Application Modernization Workshop

Leverage a Cloud, Hybrid or Local strategy and modernize your application.

What We Will Accomplish

- Review your portfolio of applications by business prioritization
- Understand concerns around speed to market, Management and Operations (M&O), and security
- Perform a SNAP analysis (Synonymous Non-synonymous Analysis Program) to determine which apps are suited for transformation. SNAP analysis is a lightweight process that is used to quickly identify and score the following characteristics of application re-platforming candidates:
 - Effort
 - Risk
 - Technical Characteristics
 - Metrics to validate that re-platforming is acceptable

Workshop Business Outcomes

- A short list of two to four applications ready to be modernized
- A review of how to get started on transforming these applications
- Establish a path to the production environment
- Best practices on moving apps to the cloud or hybrid platforms
- A follow-up proposal for a two to eight week starter pack to transform the identified applications
- Improve security
- Improve development cycle

What We'll Need From You

- A list of application candidates for app transformation
- App developer with domain knowledge of the candidate apps
- Business or portfolio owner who is committed to change and is willing to invest time and money in the transformation
- Application Architect who understands the company's initiatives

WORKSHOP DETAILS

Date/Time

Workshop schedules will be customized to meet your requirements.

Location

The Workshop can be conducted on-site at your location or at Quest's Global Delivery Centers.

Recommended Attendee Titles

Since business operations/decisions are directly tied to technology requirements for most organizations, we recommend having these key team members present:

- CIO, CISO
- VP of Apps
- CTO
- Chief Architect
- Business Lines Owner
- Key Decision Makers

Preferred Documentation to Review

We recommend having the following items ready to review for this Workshop, if they are available:

- Architecture Diagrams
- Revenue per Application

Timeline at a Glance

Pre-Workshop: Scheduling kickoff call, establishing priorities

Kickoff Call: Introductions, agenda, expectations

Workshop: Conduct a four-hour on-site Workshop

Final Review: Quest provides a two to eight week application transformation proposal
