

Modernize and Secure Your Applications and Increase Speed to Market

Experience application transformation and discover a new and exciting way to develop products with Quest Cloud Platform™.

Why Cloud Enable Your Applications?

Quest Cloud Platform™ is an open source PaaS that enables middleware to run applications in the cloud. It enables:

- Developer Productivity
- Feature Velocity (faster to market)
- Operator Efficiency (lower cost)

Why Quest Cloud Platform™?

- Reduce cost on operations and infrastructure
- Summarizes new features and changes so you can decide what is needed
- Shorten software release times
- Speed products and features to market faster
- Create and deliver software faster by automatically deploying application code
- Perform zero-downtime deployments
- Provide instant OS patches and upgrades with no downtime
- Built-in high availability
- Host on-premises or in a public cloud

Leveraging Quest

- Innovation Center
- Agile Operations
- PaaS Solution

Proven Benefits of Quest Cloud Platform™

Total Economic Impact

Forrester Consulting conducted a Total Economic Impact™ (TEI) study of the Cloud Foundry Platform that found:

- A reduction in resources allocated to DevOps due to the implementation of Quest Cloud Platform™ (QCP)
- A decrease in time-to-production
- A client ROI of 135%
- A developer productivity improvement of 81%

“A product development org where you can perform \$50k experiments rather than multi-million dollar risks.”

– **Doug Safford**
Allstate VP, Technology Innovation/CompoZed
