Cloud Workshop

Discover the information you need to operate seamlessly and securely in the Cloud

Quest's Cloud Workshop will:

Appraise Your Current Environment and Plans

Cloud capabilities and adoption are on the rise, but you may be asking...

- *What workloads or applications should I migrate to and/or use in the cloud?*

- *How can I maintain security, backup, and disaster recovery services and standards with my Cloud provider?*

- *What are the potential cost concerns with the Cloud?*

Quest's Cloud Workshop can answer these questions and more, depending on your area of focus. We'll review your current technology landscape against your business and financial goals and determine the necessary next steps and timelines for success in the Cloud – public, private, or a combination of the two.

Outline Next Steps

A Cloud Workshop provides customized recommendations that will help validate your current plan or highlight problem areas and offers a list of action items to successfully implement your unique solution. Depending on the concentration of your Cloud Workshop, our Cloud experts can:

- Identify IT capabilities that can be moved to the Cloud or a related managed service

- Determine the required level of service availability and possible delivery methods

- Address security, privacy, and compliance requirements and other roadblocks to the Cloud

- Review cost savings opportunities in your Cloud

Focus on Customization and Flexibility

Cloud computing can offer relief from the complexities of modern IT, but a one-size-fits-all service package rarely reaps the advertised benefits. Instead, start with an in-depth understanding of your present situation to help you make the right business and financial decisions for your organization's unique Cloud.

WORKSHOP DETAILS

Date/Time

What works for you and your team? Depending on your availability and requirements, we can meet with you as soon as possible, or in the near future.

Location

The Cloud Workshop can be conducted onsite at your location or at a Quest site.

Recommended Attendee Titles

If you are not the business owner and/or key decision maker, please ensure they are present; business operations/decisions are directly tied to technology requirements for most organizations. We also recommend having these key team members present:

IT Director/Manager

Executives/Business Leaders

Preferred Documentation to Review

We recommend, if available, having the following items ready to review for this Workshop:

Network Topology

Current Infrastructure Capacity Requirements

Timeline at a Glance

Pre-Workshop: Schedule kick-off call, establish priorities

Kick-Off Call: Introductions, agenda, expectations

Workshop: Conduct a one-day, onsite Workshop

Final Review: Quest provides Executive Summary including recommendations and action items
