

Quest Enterprise File Sharing

Securely store, share, access and backup files from any device, without losing IT oversight

Quest's file sharing platform allows enterprises to store files based on size, security, and compliance requirements, customized for cloud, on-premise, or hybrid solutions. Users experience seamless access from any device, regardless of where files are stored.

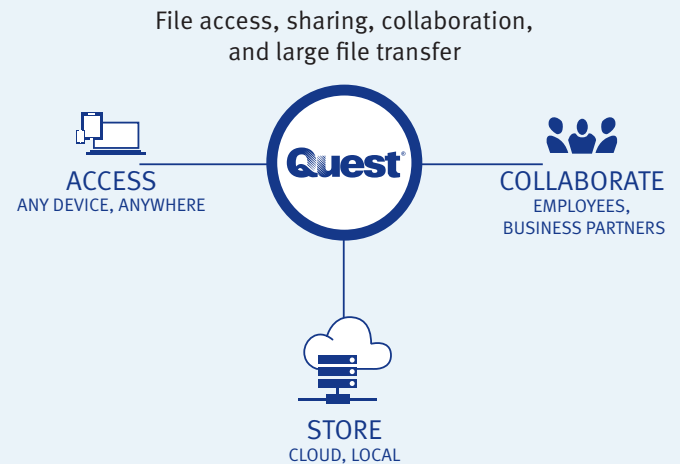

We provide customized file sharing deployment models for all enterprise needs:

- Cloud or local file sharing
- Remote access to files stored on-premise
- Fast local file access while in the office
- Cross-office collaboration

With Quest's 30-day Enterprise File Sharing Trial, users granted permission can access a single view of all files regardless of where they are stored – a computer, local office storage, remote office storage, or the cloud.

Quest File Sharing platform is a custom solution inspired by data gravity: the simple idea that not all files were meant to be “up in the cloud.”

See what your organization could gain with Quest's 30-day **Enterprise File Sharing Trial**, equipping you and your team with:

- Centrally-located file storage and management
- Advantages of both local storage *and* cloud hosting
- Any location-any device access and file sharing
- Easily-shared files, whether between offices or with business partners
- Safe backups in the cloud
- Central administration for visibility and control

Flexibility of cloud, security of local storage, and performance of hybrid

Test-drive Enterprise File Sharing with Quest!

Invest in the Capability, not the Product®
