

**Affordable  
Secure Replication with  
Quest & NetApp**  
As low as \$1500/month (5TB)

**The Challenge**

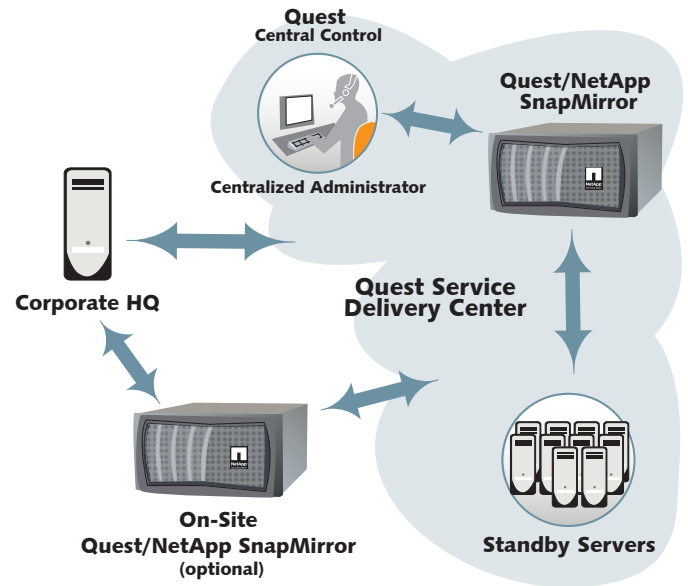

Provide instant access to your business-critical data

In today's 24x7 global world, you need to protect and quickly recover your data in the event of damaging natural or man-made events. You also need an efficient way to distribute your data to remote locations for development and testing, QA, or to meet archive

and compliance mandates. Without an effective data protection and distribution strategy, your operations can be brought to a standstill, resulting in lost productivity, reputation and revenue.

**The Solution**

NetApp SnapMirror is a cost-effective, secure and easy-to-use disaster recovery and data distribution solution. It replicates data at high speeds over LAN or WAN, providing you with high data availability and fast disaster recovery for your business-critical applications, including Microsoft Exchange, Microsoft SQL Server, and Oracle. By mirroring data to one or more NetApp storage systems and continually updating the mirrored data, your data is kept current, secure and you can use the mirrored data for multiple purposes.

**Quest Advantages with NetApp**

Use Quest for secure, offsite data protection and archiving and enjoy business benefits you can realize today...

- Rapid 7x24x365 data recovery with maximum Business Continuity/ Disaster Recovery (BC/DR) capability
- Immediate BC/DR solution deployment
  - Cost-effective, flexible pricing
  - No up-front IT investment and operating overhead
  - No need to build and staff a dedicated DR center
  - No need to buy software and hardware for a DR center
- Rapid compliance solution deployment while minimizing implementation costs

**Learn how to improve your company's fault tolerance with replication services.**

A typical 30-minute Quest Replication Services Review includes:

- Introduction: Objectives & NetApp SnapMirror solution overview
- Customer Profile: Understanding your environment
- Recommendations: Suggestions to improve your fault tolerance
- Q&A: Quest experts will answer all of your questions

**NetApp  
SnapMirror**  
Increase availability and speed recovery of  
your business critical applications

**Simplify Setup and Administration**

Quest can set up your SnapMirror solution quickly and easily – on a dedicated or shared system – handling administration and operation tasks using Protection Manager software. Built-in SNMP support enables easy integration with any SNMP framework. With NetApps' simplified setup and use, you reduce the likelihood of operator error during the recovery process, enabling faster recovery from disaster.

**Complete integration**

Quest works seamlessly with your staff, systems, policies and procedures. Our NetApp Replication Services give you access to a multi-disciplinary team of Quest consultants, project managers, designers, engineers and product specialists. We represent the full spectrum of business technologies, systems and applications. With 7x24x365 protection, your assets are secure.
